

***The Answer is Digital...***  
***...But what's the Question?***

Professor Keith McNeil  
Assistant Deputy Director General  
Chief Clinical Information Officer  
Queensland Health

# ***Our Challenge...***

***How do we move from data,  
to highly effective decision making?***

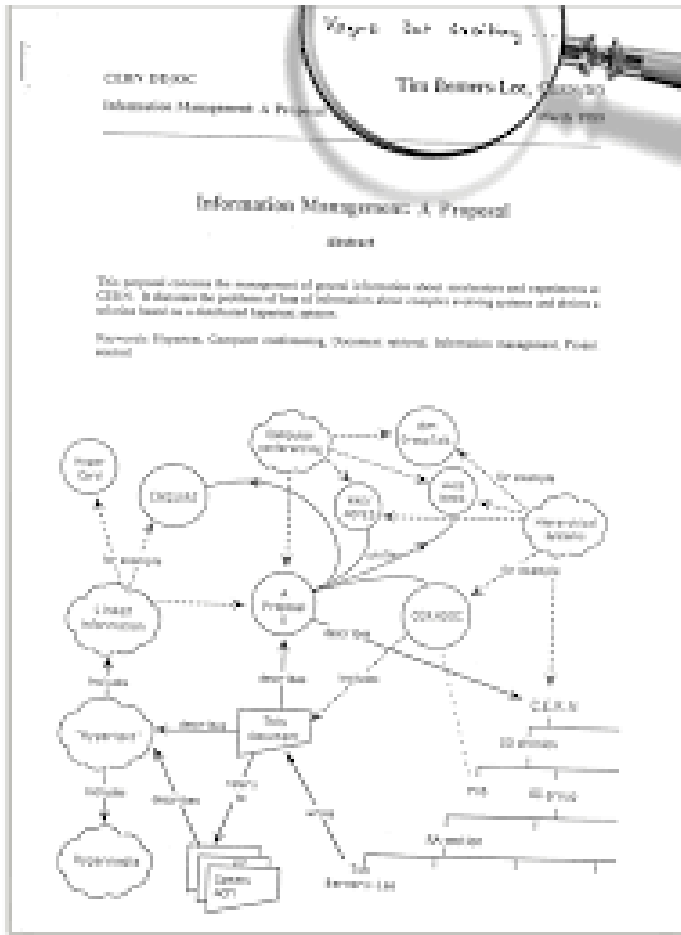

# *The path to...*

*"Vague but exciting"*

*Mike Sindall 1989*

# Information Management: a proposal

- **WWW...**

*“In those days, there was different information on different computers, but you had to log on to different computers to get at it.*

*Also, sometimes you had to learn a different program on each computer.*

*Often it was just easier to go and ask people when they were having coffee...”,*

## ...the here & now

***...the here & now...in healthcare!***

***This is all about patient outcomes  
...not just technology!***

# Great news!

## Life expectancy reaches all-time high

Declines in death rates from most major causes have pushed Americans' life expectancy to a record 77.6 years.

### Estimated life expectancy, 1943-2003

### By race and gender, 2003

# *Healthcare in the 21<sup>st</sup> century*

***And, we have made an unholy mess of it !***

# ***Information & Chaos***

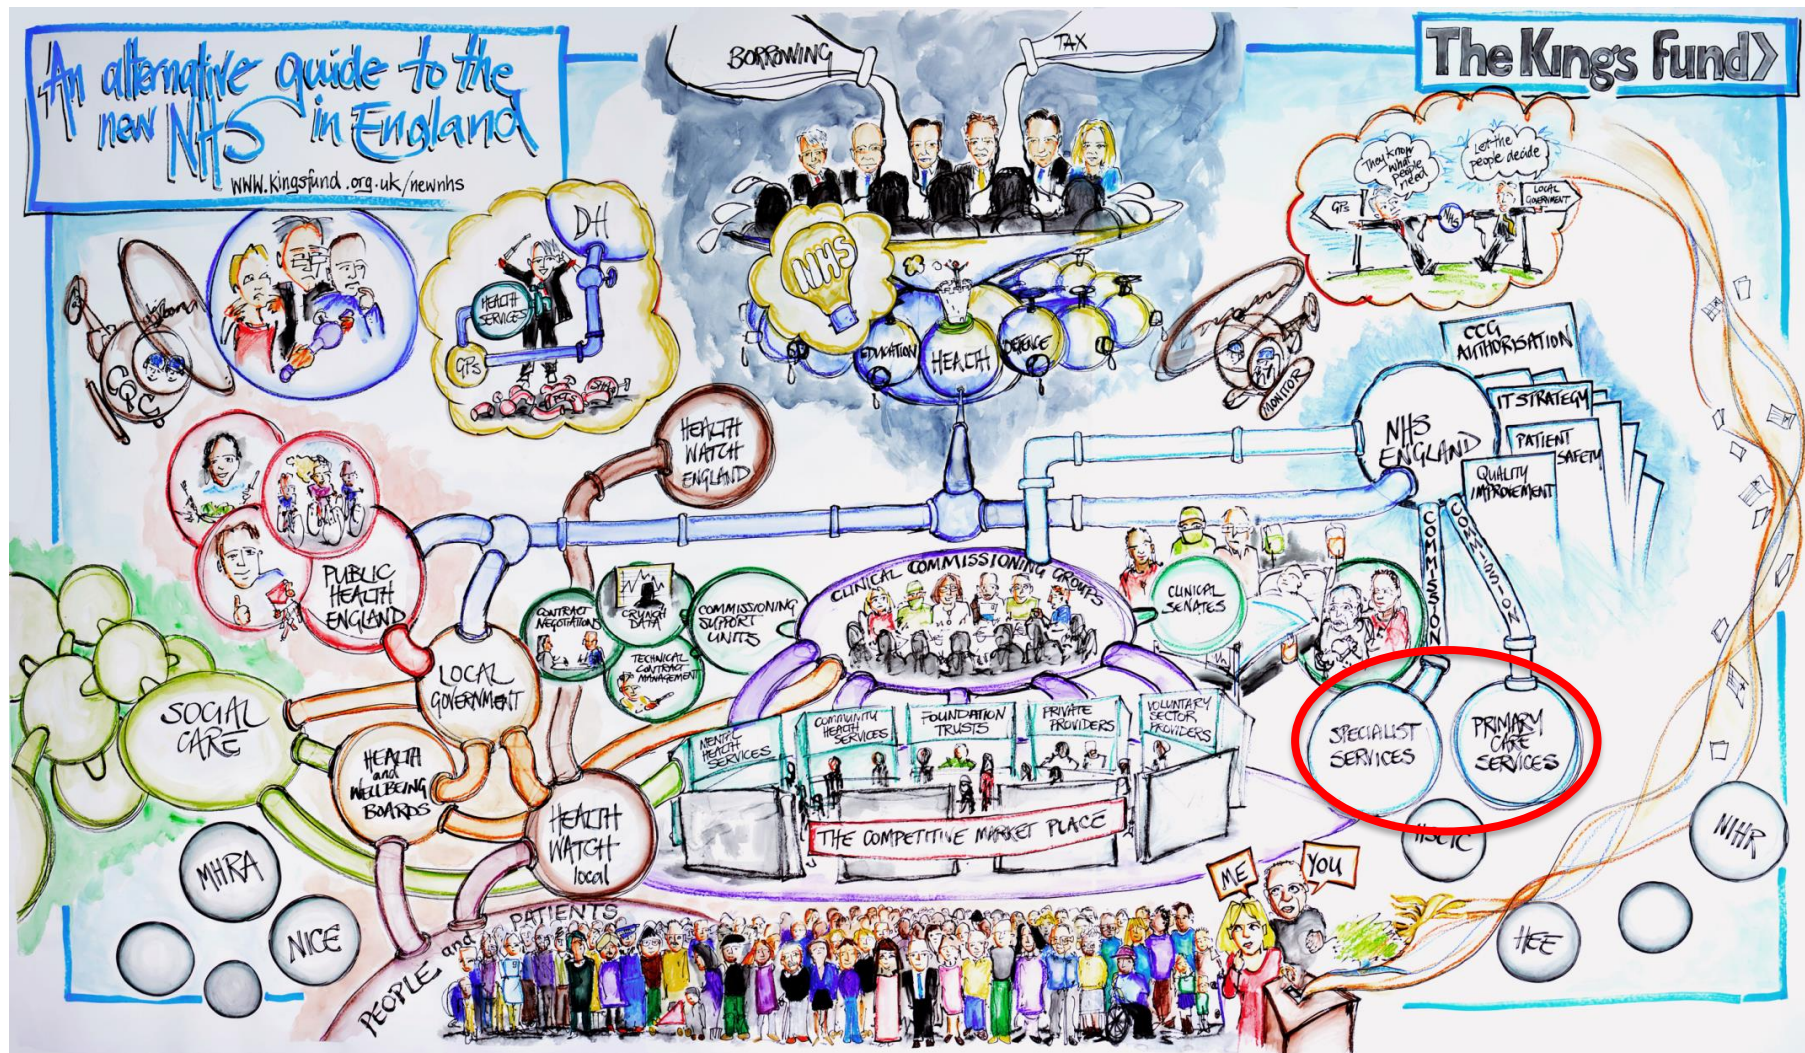

- ***Information*** brings order to chaos...  
    ...***data enables the reduction of uncertainty***
- Our understanding of ***complexity & chaos*** is dependent on the quality of the ***information*** we have available
- **Chaos is not random**
  - It only appears unpredictable because we can't measure & interpret all the variables and variation in the data
    - ventricular fibrillation...

# Ventricular fibrillation – not random after all (but it is chaotic!)

# And, we have made an unholy mess of it !

- The Moonshot
  - First US manned space mission in 1961
    - Apollo 11 just 8 years later
  - required radical re-thinking around organisational dynamics and ***information sharing***
  - critically reliant on networks and communications between these different groups
    - complex adaptive organisation

## Space Shuttle Challenger disaster

28 January 1986

**Francis R. Scobee**, Commander  
**Michael J. Smith**, Pilot  
**Ronald McNair**, Mission Specialist  
**Ellison Onizuka**, Mission Specialist  
**Judith Resnik**, Mission Specialist  
**Greg Jarvis**, Payload Specialist  
**Christa McAuliffe**, Payload Specialist

BUTROUS FOUNDATION

# Challenger 1986

# JTO in Iraq

- 2003
  - 13 missions per month
  - command & control organisation
    - information shared on a “need to know” basis
- 2007
  - 300 missions per month
    - little increase in funding or personnel
  - complex adaptive organisation – “team of teams”
    - shared intelligence
    - high quality, real time information access
    - everybody “needed to know”!

# ***Information in the 21<sup>st</sup> century***

Critical for dealing with complexity

- Allowing ecosystems to become ***self-organising***
  - fostering ***organisational resilience*** at every level
  - ***distributed decision making*** is key
    - dependent on the ***availability and flow of information***

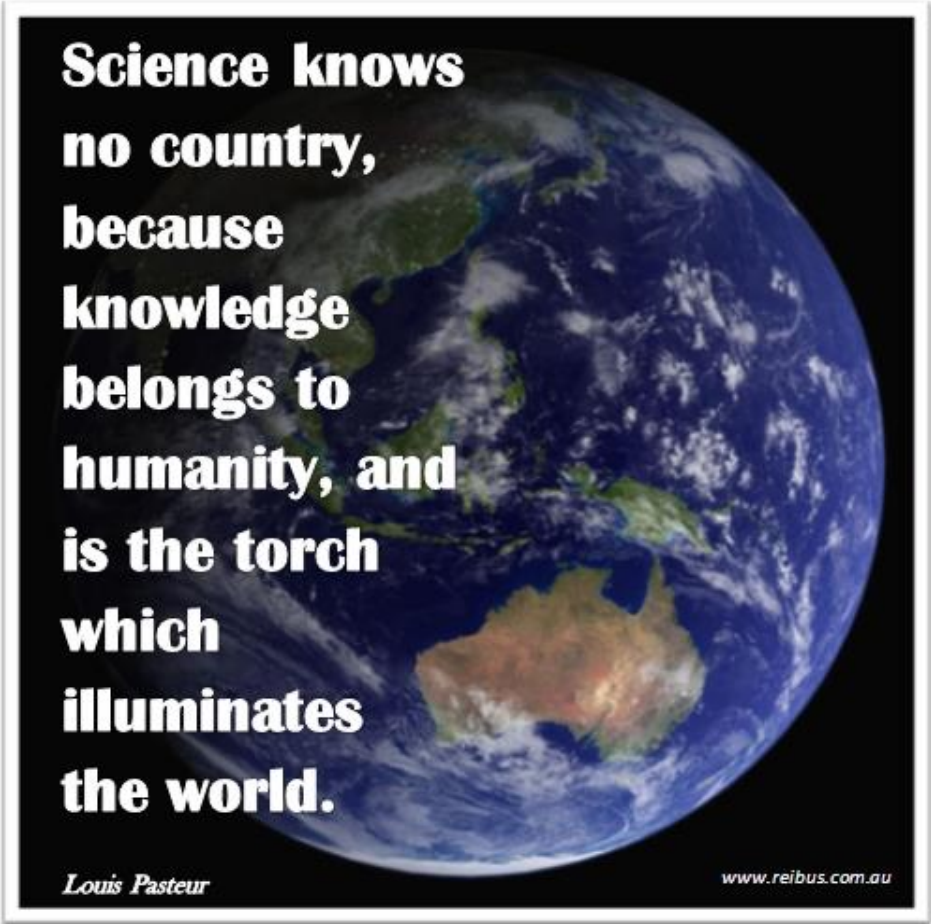

***The 17 minute story***

# ***Leadership in the Digital Age***

As in any age, leadership is critical to encouraging and enabling ***innovation***;

...and ***engaging and empowering*** those who actually deliver, and are recipients of, healthcare services

***...democratise data***

**Science knows  
no country,  
because  
knowledge  
belongs to  
humanity, and  
is the torch  
which  
illuminates  
the world.**

*Louis Pasteur*

[www.reibus.com.au](http://www.reibus.com.au)

*which brings us to...*

# ***Our Digital Health Agenda***

***Data data everywhere and not a byte to think***

# *Why digital?*

- Last 2 years
  - more data generated than in all human history
  - by 2025 - 47 zetabytes!!!
- 100,00 genomes = 21 petabytes
  - 1 Pb music – 2000 years of continuous playing!
- Opportunity for use of AI & machine learning
  - reliant on accurate longitudinal data sets

# There is a better way!

www.shutterstock.com · 1613207

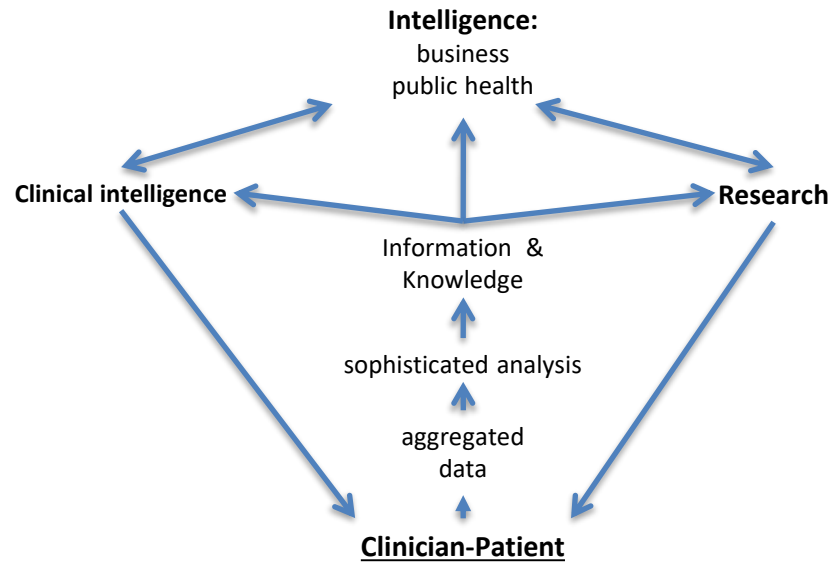

# ***The Aim...***

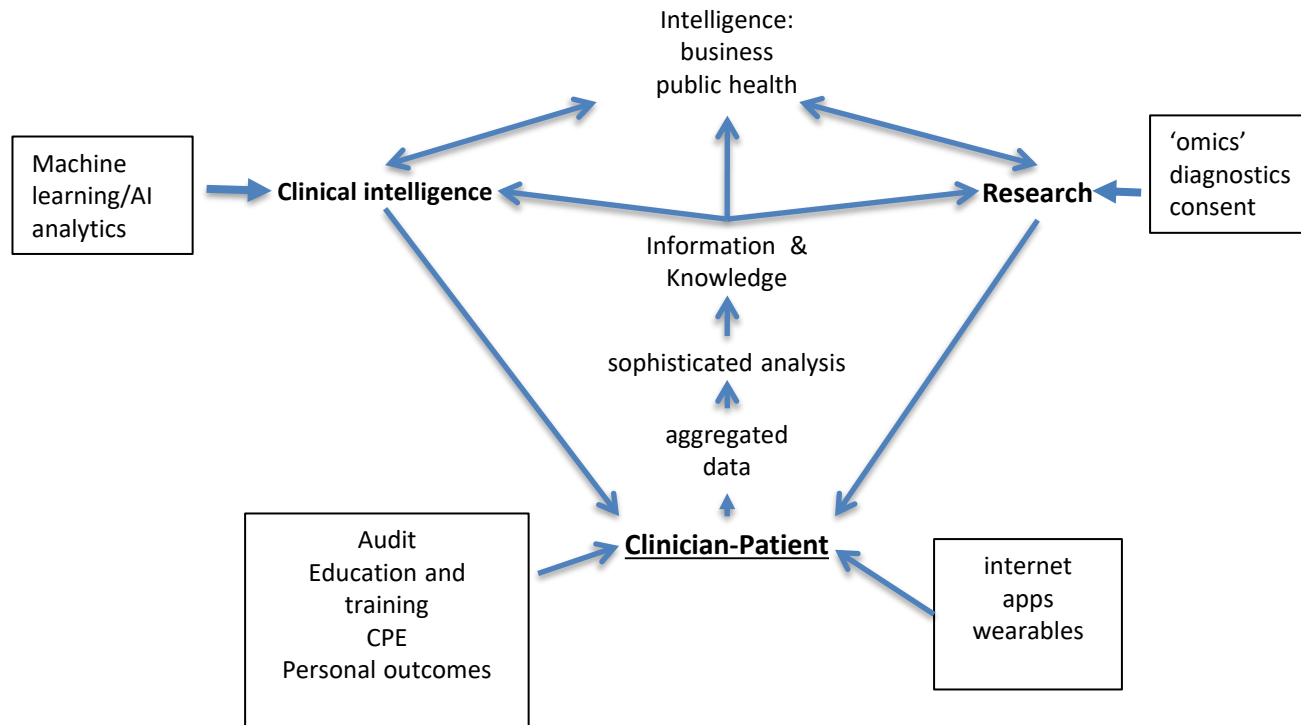

- Create ***learning/knowledge based organisations***; at all levels
  - use ***information & knowledge*** to make more informed and therefore better decisions
    - at all points of decision making

# Towards a *learning & knowledge based* system

**“Virtuous Circle”**

# ***System Sustainability***

## The Two Keys to Unlocking the Productivity Paradox of Digital Transformation

Improve the  
technology

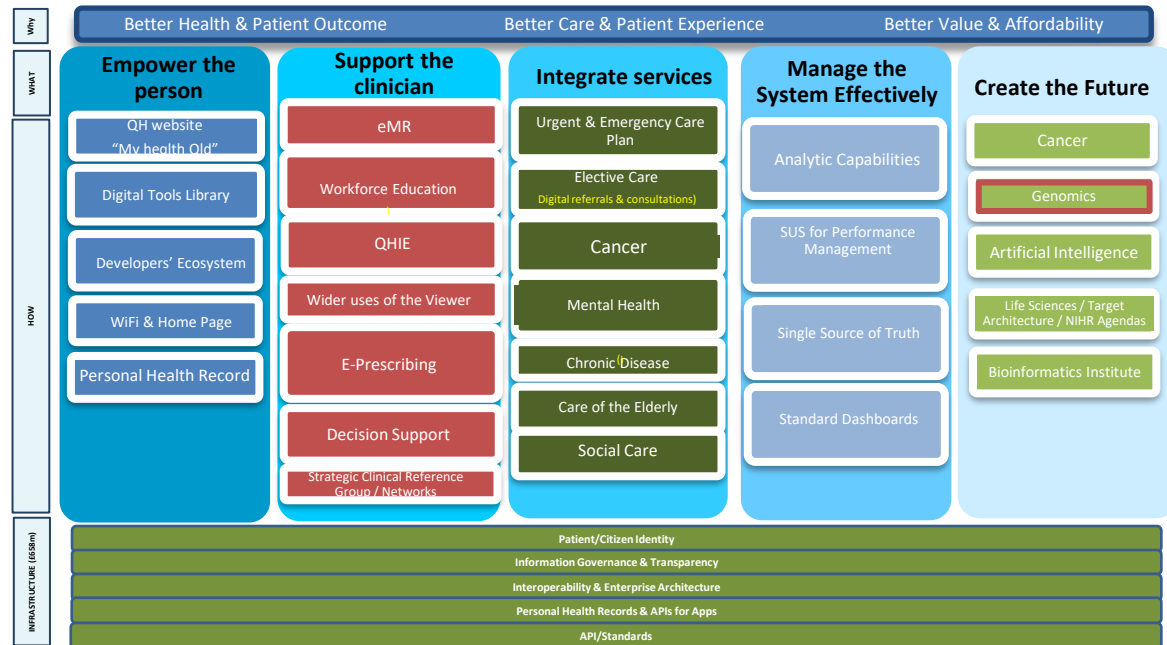

Reimagine  
the work  
itself

*Reference: Erik Brynjolfsson, MIT*

# ***The Strategy...***

- Enable structured/standardised ***data*** collection from across the system
  - We all talk the same language
- Enable that ***data*** to be distributed across the system
  - JTO productivity dividend
- Encourage innovative ways of capturing ***data***
  - wearable's, apps etc
- Facilitate analysis and application of ***data*** at multiple levels
  - local, population, cohort, metadata sets, 'big' datasets

# Digital Transformation of Healthcare

HORIZON 1	HORIZON 2	HORIZON 3
-----------	-----------	-----------

BUILDING DIGITAL FOUNDATIONS:  
BETTER CARE FOR INDIVIDUAL PATIENTS

TRANSFORMING PATIENT CARE:  
BETTER CARE FOR GROUPS OF PATIENTS

REIMAGINING OUR FUTURE: NEW  
AND INNOVATIVE MODELS OF CARE

 PEOPLE	Our workforce builds digital literacy	Intelligent use of data	Innovative workforce
 PROCESS	Integrating information and technology	Transparency to increase efficiency	Digital innovation allows new models of care
 INFORMATION	Collecting and collating	Live streaming analytics	Predictive and prescriptive analytics available
 TECHNOLOGY	Broadens workflows to improve care	Establish links between data and analytics	Integrate innovative technology in the digital platform

- CULTURAL READINESS
- TECHNICAL EXCELLENCE
- DIGITAL CLINICAL GOVERNANCE
- SINGLE SOURCE OF TRUTH FOR DATA
- INFORMATION GOVERNANCE AND TRANSPARENCY
- INTEGRATION
- DISASTER RECOVERY AND CYBERSECURITY
- DIGITAL PARTNERSHIPS WITH RESEARCH TEAMS AND UNIVERSITIES

***Where we are we now...***

## ***Where we want to be...***

- A learning & knowledge based organization at all levels, at the cutting edge of digital medicine, where:
  - individuals use data to drive their own Q
    - » improving patient and organizational outcomes
  - learning and benefits are shared across the system
  - system sustainability and enhanced effectiveness is embedded

# ***From Data to Decisions...***

***Data***

***Descriptive*** - the rear view mirror  
Tells us what's happened

***Diagnostic***  
Tells us why it happened

***Predictive***  
Tells us what's going to happen

***Prescriptive***  
Tell us what to do before it happens!

***...and this is how we  
will transform  
healthcare***
